

UHV 2 : Assignment-1

Trivijay Balasaheb Jawale

November 10, 2022

Roll Number : 224027

PRN : 22110901

Division : SY D (Computer Engineering)

Aim : To understand what is natural acceptance by a discussion on "what do you mean by natural acceptance". Also illustrate with examples, whether it is invariant with time and space.

1 What is natural acceptance?

When our body or mind accepts a thing independent of any likes or dislikes, which is unbiased, is called as natural acceptance. It is the condition when we accept a fact without any other thought. Thus, it does not vary with time or space. It is a totally acceptable state of our mind.

2 Why is natural acceptance important?

The natural acceptance is important because it is the state which leads to an internal fulfilment, and a state of peace and internal harmony. It is accepted by all without any exception. Despite of variations in likes and dislikes of every individual, the natural acceptance is same for all the humans.

3 How is natural acceptance achieved?

The natural acceptance is not required to be achieved, but is a natural instinct. It is a part of the human nature.

4 Common instances of natural acceptance

Some of the familiar situations of natural acceptance are :

- We want internal happiness, prosperity and satisfaction
- Desire for an internal harmony
- Desire to have a feeling of trust and love in any relationship
- Expecting respect from others
