

# UHV 2 : Assignment-2

Trivijay Balasaheb Jawale

November 30, 2022

**Roll Number :** 224027

**PRN :** 22110901

**Class :** SY D (Computer Engineering)

**Aim :** To understand what is meant by prosperity by discussion on - "what is meant by prosperity", "how can it be achieved" and "does accumulation ensure prosperity".

## 1 What is prosperity?

The state of life, when a person can be considered as economically, physically as well as mentally successful, is called as prosperity. The prosperity is a state of overall achievement and overall happiness.

## 2 What is accumulation?

Accumulation is collection of material needs and valuable assets. It can be defined as the abundance of valuable assets.

## 3 Differentiate between prosperity and accumulation?

The accumulation is entirely different from the prosperity. The prosperity is the state of a complete satisfaction, however, the accumulation is just a material gain.

## 4 How to achieve prosperity in our life?

The prosperity can be achieved in our life by giving a proper importance to the requirements of our life and working for it. It is not necessary to get the material things in excess, but they should be sufficient to satisfy our needs. This state is the prosperity.

## 5 Does accumulation ensure prosperity?

The accumulation of the material wealth do not ensure prosperity. This is because the accumulation cannot provide happiness.
